Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Drawings

1. The application has been allowed, formal drawings are required in response to this Office Action.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement for reasons for allowance:
 - Claims 1, 14 and 19 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **sending/receiving a request for information about a destination node from a source node (host or router) to a server node that responds to such requests on behalf of the destination node; forwarding the request from the server node to the destination node; sending a response to the request from the destination node to the server node; and forwarding the response from the server node to the source node.** It is noted that the closest prior art, Chiang et al., (US Patent 5,835,725) shows the address resolution technique only involved with two nodes instead of three. However, Chiang et al. fails to disclose or render obvious the above underlined limitations as claimed.
 - Claims 6, 11, 15 and 20 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **determining at the Next Hop Servers to forward the NHRP resolution request to the destination and the intermediate station does not act as server node and destination node.** It is noted that the closest prior art, Chiang et al., (US Patent 5,835,725) shows the address resolution technique only involved with

Art Unit: 2697

two nodes instead of three. However, Chiang et al. fails to disclose or render obvious the above underlined limitations as claimed.

- Claims 16, 17 and 18 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **the address resolution of a destination node; the communication between three different nodes; the time, value and length which are an extension to the registration request.** It is noted that the closest prior art, Chiang et al., (US Patent 5,835,725) and Reed et al. (US Patent 6,061,739) show the address resolution technique only involved with two nodes instead of three. However, Chiang and Reed et al. fails to disclose or render obvious the above underlined limitations as claimed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure

- Fendick et al. (US Patent 6,252,857) discloses provisioned and dynamic QoS in a communications network
- Horikawa et al. (US Patent 6,009,102) discloses NHRP packet authentication method and NHRP server
- Sakagawa et al. (US Patent 6,421,321) discloses apparatus and method for transferring a packet flow in a communication network
- Alexander, Jr. et al. (US Patent 6,178,171) discloses route switching mechanisms for source-routed ATM networks
- Civanlar et al. (US Patent 5,996,021) discloses internet protocol relay Network for directly routing datagram from ingress router to egress router

- Civanlar et al. (US Patent 5,828,844) discloses internet NCP over ATM
- Kujoory et al. (US Patent 6,021,263) discloses management of ATM virtual circuits with resources reservation protocol

- Horikawa et al. (US Patent 6,047,329) discloses non-broadcast multi-access network system capable of carrying out transmission of a next hop resolution protocol packet without setting internet protocol addresses
- Mahler et al. (US Patent 6,381,638) discloses system and method for options based address reuse
